PROFILE

Software developer who ships production-grade tools end to end — from a self-updating Ubuntu CLI backed by **510 automated tests** to a serverless proxy panel running on **Cloudflare Workers**. Builds bilingual (EN/FA) web platforms, Telegram bots and Three.js scenes, and publishes everything through a self-engineered portfolio platform that serves **50+ live projects** with automated CI/CD, analytics and a custom admin panel.

SELECTED PROJECTS — OPEN SOURCE

Ubuntu Optimizer
Creator & Maintainer · Bash · MIT

Self-updating CLI that cleans, optimizes, repairs and secures Ubuntu — DNS switcher, kernel cleanup, swap manager, fzf launcher, AppImage/tar.gz installer.

- 510 automated tests; bilingual EN/FA interface; JSON reports & systemd timers
- Live demo & documentation served via GitHub Pages

Flash Panel
Creator · TypeScript · Cloudflare Workers

High-performance serverless VLESS/Trojan proxy panel with WARP integration, edge telemetry, auto-tuning and a Telegram bot for full remote control.

- Zero-server architecture on Workers; anti-censorship routing

Obsidian Project Quest
Creator · Bilingual vault template

Duolingo-style gamified Obsidian vault: XP, streaks, levels, badges and live dashboards — in English and Persian.

- Also: **obsidian-sync-scripts** — self-healing Obsidian ↔ GitHub sync for Termux/Linux/macOS · **projdump** — turns any codebase into one AI-ready file (70+ tests, shellcheck-clean)

PLATFORM — IMSOROUSH.IR

Founder & Engineer
Next.js 16 · Cloudflare Workers · D1

- Bilingual FA/EN interface, dark/light theming, full SEO (JSON-LD, sitemap.xml, RSS feed)
- Automated pipeline syncs public GitHub repos into 50+ project cards via GitHub Actions with lint & typecheck gates
- Custom admin panel — content management, contact inbox, subscriber analytics

WRITING — SELECTED ARTICLES (PERSIAN)
